- Take some time to think of what you want users to search for, the criterion for search, and format of output. Create a new empty document and call it "Task-2.7". Place your thoughts in this document. Save the document.
  - Since my recipe app its pretty simple I just want to be able to search recipes names.

"Data Analysis"

- Normally on this type of app I wouldn't put any chart visualization, but I Want the practice so I'll implement all the 3 charts in the lesson.
