Exercise 2.5: Django MVT Revisited

Learning Goals

•   Add images to the model and display them on the frontend of your application
•   Create complex views with access to the model
•   Display records with views and templates

Reflection Questions

•   In your own words, explain Django static files and how Django handles them.
- Static files are not generated dynamically or modified while the app runs they remain the same, Static files can be css,images or javascript

•   Look up the following two Django packages on Django's official documentation and/or other trusted sources. Write a brief description of each.

Package	Description
ListView	Displays information from a database table in specific order
DetailView	Shows all info about specific item

•   You're now more than halfway through Achievement 2! Take a moment to reflect on your learning in the course so far. How is it going? What's something you're proud of so far? Is there something you're struggling with? What do you need more practice with? You can use these notes to guide your next mentor call.

- Had a hard time with my models and linking between pages, but I'm starting to get the Django way
